

# Quality and Environmental Policy

Cox Powertrain Limited aspires to significantly reduce the marine emissions and the total cost of ownership for our customers through the application of innovative technologies in high performance propulsion systems. In achieving this we will ensure that our environmental impact and that of our suppliers and customers is minimised to the greatest possible extent.

We will delight our customers by ensuring trouble-free operation of our products and providing exceptional service, maintenance, and warranty options.

We are committed to world-wide statutory and regulatory compliance for our operation and products, by continuing to explore new technologies and design solutions relating to safety, fuel efficiency, reliability, and the environment.

Cox Powertrain's Management Team will achieve these goals by maintaining a robust Business Management System. This will incorporate relevant quality and environmental objectives and targets, against which we can measure and improve our customer satisfaction and minimise our environmental impact.

A handwritten signature in black ink, consisting of a large, stylized 'G' followed by a horizontal line that tapers to the right.
